

# WASTE COMPACTING MACHINE SUPERLIZZY 500FULL

COMPACTING MACHINE FOR UNSEPARATED WASTE

Screw system with continuous compaction

Automatically opening front door for waste introduction controlled by proximity sensors

Automatic separation of liquids from solid waste

- Compacted solid waste collected in a bag
- Liquids collected into a tank or discharged directly into sewers
- Bag and tank placed on a special trolley

Possibility to use the machine for separated collection of individual waste types (plastic, paper, aluminium, ...)

CUSTOMISATION

The **compact** and **efficient** design of SuperLizzy easily allows it to be located outdoors or indoors such as restaurant lounges or working places.

SUPERLIZZY can be **built into existing** restaurant **furnishings** or can be an important communication means or distinctive furniture element thanks to the livery and the **easy customisation**.
