NEW MODEL

WASTE COMPACTING MACHINE

# SUPERLIZZY 600PET

COMPACTING MACHINE FOR PET BOTTLES AND CANS

Screw system with continuous compaction

Automatic separation of liquids from solid waste

- Compacted solid waste collected in a bag
- Liquids collected into a tank or discharged directly into sewers
- Bag and tank placed on a special trolley

**"TOWER" DESIGN**  
PERFECT TO SUPPORT  
VENDING MACHINES

WASTE  
IDENTIFICATION

The automatic identification optional module allows the bar-code reading of the waste introduced inside the machine.

The module can be associated with the printer module issuing the receipt (see back of the sheet) in order to communicate about discounts or benefits to Superlizzy users or with a standard rechargeable key reader (to recharge it automatically at each waste introduction).

## Simple and efficient!

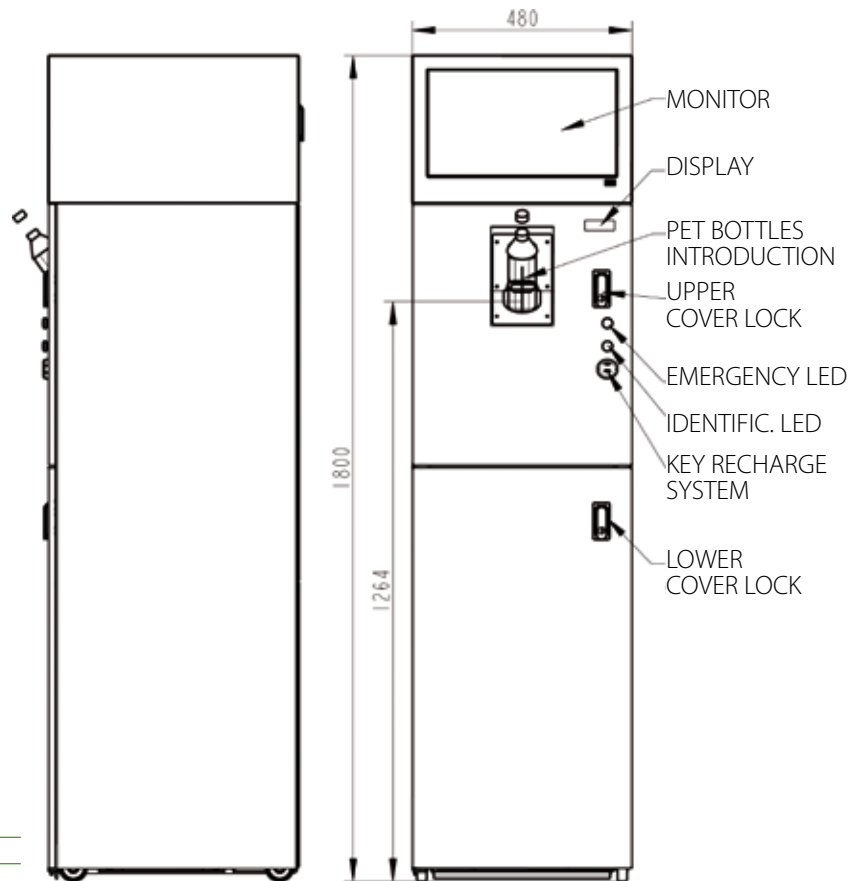

- 1) Place the waste on the introduction opening.
- 2) Wait for the bar-code optical reading: once the reading is completed the green lamp lights up.
- 3) Introduce the waste in the Superlizzy for compaction.

**SUPERLIZZY**

**Making space for nature!**

# WASTE COMPACTING MACHINE SUPERLIZZY 600PET

COMPACTING MACHINE FOR PET BOTTLES AND CANS

Depth	560mm
Width	445mm
Height	1800mm (with monitor)
Net weight	120kg
Voltage feeding	208/230 (V) single phase (+/- 10%)
Frequency	50/60 Hz
	Connection with Schuko plug 16 Amp
Installed power	750 Watt
Noise	<60Db
